

## EARLY ENTRY

Presell tickets and save time at the door! The Ice House will provide personalized tickets for the group. Using the ticket eliminates lines at the door! Group may arrive 1/2 hour early to assure a great fitting skate and a shorter line to the skate counter!

**Dress Warmly...**The average temperature inside the rink is a chilly 35-50 degrees depending on the season. Most skaters wear long pants and a sweater or jacket. You might want to wear a hat, scarf or gloves during the winter months. Smaller children may want to wear a bicycle helmet for added protection. Once you start skating, you will warm up fast!

**Skate Tip...**Figure skates are better for beginner skaters since the toe pick helps you walk on the ice before you learn to glide. If you rollerblade, hockey skates will be most comfortable.

Don't forget to check the school calendar! Teacher workdays are great days to bring your youth group or even your school for a great day at the rink!

Schedule your group today!
